Mulgara - Bug #179

Doing a FILTER REGEX with 2 parameters gives an error

02/03/2009 05:44 AM - Paula Gearon

Target version:	SPARQL Query Engine		
Resolution:	fixed		

Description

Simple queries with 2 parameter regex filters fail with NPE. e.g.:

```
select * where { ?s ?p ?o filter regex(?o, ".*sold.*") }
```

History

#1 - 02/03/2009 05:47 AM - Paula Gearon

The error message being printed was the message of the "Cause", but NPEs have neither a cause nor a message. So the name of the exception is being printed. See r1474.

The NPE was being caused by the regex class expecting a "flags" parameter, though this is optional. Cleaned up code in several places to handle nulls in this argument. Fixed in r1473.
