

Mulgara - Bug # 196: N3 parser fails on colon

Status:	New	Priority:	High
Author:	Gregg -	Category:	Mulgara
Created:	08/30/2009	Assignee:	Paula Gearon
Updated:	08/30/2009	Due date:	
Resolution:			
Subject: N3 parser fails on colon			
Description			
<p>The TQL load command fails on:</p> <pre>@prefix eg: <http://example.org/ns#> . eg:foo a eg:FooDad; eg:long:tag eg:Oops .</pre> <p>returning:</p> <pre>Error 500 Unable to load file:///tmp/test.n3 into http://example.org/data: No @prefix for :tag</title></pre> <p>But I believe colons are allowed here; in any case this n3 validates fine at http://www.rdfabout.com/demo/validator/validate.xpd</p> <p>I'm running 2.1.3; the issue tracker's version dropdown needs updating.</p>
