

Mulgara - Bug #206

MulgaraUserConfig uses system classloader for conf/mulgara-x-config.xml

09/27/2009 06:54 PM - Karsten Huneycutt -

Status:	New	Start date:	
Priority:	Normal	Due date:

Target version:	General development		
Resolution:			
Description			
<p>The MulgaraUserConfig class uses the system class loader to find conf/mulgara-x-config.xml. In some cases, the system class loader is not necessarily the class loader that was used to load the mulgara jar, so it is unable to find the config file that is in the mulgara jar.</p> <p>The simple fix is to change</p> <pre>URL sysUrl = [[ClassLoader]].getSystemResource(CONFIG_PATH);</pre> <p>to</p> <pre>URL sysUrl = this.getClass().getClassLoader().getResource(CONFIG_PATH);</pre> <p>in src/jar/server/java/org/mulgara/server/MulgaraUserConfig.java, line 89.</p>
