

Mulgara - Bug #95

Remote backups not compressed

04/03/2008 10:40 PM - Paula Gearon

Status:	New	Start date:	
Priority:	Normal	Due date:

Target version:			
Resolution:			
Description			
<p>When calling remote backup on a graph on a server (meaning the server saves the file to the local filesystem) the backup file is not compressed if the backup file ends in .gz. This contradicts remote load, which will try to decompress files that end in .gz.</p> <p>Local load and graph backup are always uncompressed, regardless of filename.</p>
