

Mulgara - Bug #100

Closing Answer from implicit transaction closes subsequent explicit transaction

04/18/2008 02:12 AM - Andrae Muys -

Status:	Closed	Start date:	
Priority:	Urgent	Due date:	
Assignee:	Andrae Muys -	% Done:	0%
Category:	Mulgara	Estimated time:	0.00 hour
Target version:			
Resolution:	fixed		
Description			
<pre>setAutoCommit(true); query() -> answer setAutoCommit(false); query.close(); commit(); setAutoCommit(true);</pre>			
The commit fails to reserve the writeLock complaining that the writeLock has already been released.			
Test case duplicating bug has been added to AdvDatabaseSessionUnitTest .			

Associated revisions

Revision 796 - 04/18/2008 02:15 AM - Andrae Muys -

refs #100

Adds a test for a transaction bug found by James Leigh.

```
setAutoCommit(true);
query() -> answer;
setAutoCommit(false);
answer.close();
commit(); // fails attempting to reserveWriteLock.
setAutoCommit(true);
```
