

Mulgara - Bug #106

ConnectionFactory caches closed connections

05/08/2008 05:28 PM - Alex Hall -

Status:	Closed	Start date:	
Priority:	High	Due date:

Target version:			
Resolution:	fixed		
<b>Description</b> The ConnectionFactory caches Connection objects based on server URI. If one process gets a connection to a server from the factory, operates on it, and closes the connection, then the next process that gets a connection to the same server from that factory will receive a connection that is already closed and therefore useless.
