<b>Target version:</b>	SPARQL Query Engine		
<b>Resolution:</b>	fixed		
<b>Description</b>			
ASK queries are not yet implemented.			
Session should be updated to handle an ASK query. In this way the new "Boolean Answer" can be returned for ASK queries. This is NOT necessary, but will cut dramatically cut down on network bandwidth.			
Boolean answers will be a new trivial Answer type that returns a single row. The variable will be called "result", and the value in the single row will be "true" or "false".			

### History

#1 - 10/15/2008 05:15 AM - Paula Gearon

- Status changed from New to Closed

- Resolution set to fixed
