

Mulgara - Bug #125

Configured transaction timeout is overridden with hard-coded value

05/20/2008 09:20 PM - Alex Hall -

Target version:			
Resolution:	fixed		

Description

The transaction timeout for use with database transactions is configurable in the Mulgara config file. However, the configured transaction timeout is overridden with a hard-coded value of one hour in the [DatabaseSession](#) constructor (DatabaseSession.java, line 238-239) :

```
<pre>
```

```
The hard-coded value of one hour is not long enough for loading very large files.
```

History
