

Mulgara - Bug #134

Jar files contain duplicates

Description

There are multiple occurrences of several files in the distribution jars. For instance, grepping for the Castor generated file Jetty:

```
$ jar tf mulgara-2.0.0.jar | grep 'Jetty\.class'  
org/mulgara/config/Jetty.class  
org/mulgara/config/Jetty.class  
org/mulgara/config/Jetty.class  
org/mulgara/config/Jetty.class  
org/mulgara/config/Jetty.class
```

The final jars are built out of several sub-jars, which is where the duplicates come from. These duplicates need to be removed.
