Mulgara - Feature #148

Remove Jena dependency in date types

09/19/2008 09:03 PM - Paula Gearon

Status:	Closed		**Start date:**

Target version:	SPARQL Query Engine			
Resolution:	fixed			

Description

The date types of gYear, gMonth, gDay, gMonthDay and gYearMonth are using Jena XSD classes to wrap the fields in a java.util.Calendar object, despite parsing everything themselves. The work is redundant, and it is creating an artificial dependence on Jena code. This should be removed.

History

#1 - 10/07/2008 07:32 PM - Paula Gearon

- Status changed from New to Closed

- Resolution set to fixed

This will be in the 2.0.6 release

#2 - 10/10/2008 12:18 AM - ronald -

The fix occurred in [r1267](#).
