

Mulgara - Bug #162

Transactions involving transactional resolvers do not have snapshot isolation

10/23/2008 01:40 PM - ronald -

<b>Status:</b>	New	<b>Start date:</b>

<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b>			
<p>See <a href="http://www.topazproject.org/trac/ticket/1036">http://www.topazproject.org/trac/ticket/1036</a> for the scenario. Because resolvers are enlisted lazily, mulgara suffers from the same problem. But attempting to always enlist all resolvers at the beginning of every transaction may be quite expensive, and is also in the case of the distributed resolver nearly impossible.</p> <p>We may want to add a flag so users can choose whether they want this or not.</p>
