

Mulgara - Feature #172

Add Talis changeset files as an uploadable file type on the SPARQL/TQL HTTP interfaces.

11/21/2008 12:51 AM - Paula Gearon

Target version:	SPARQL Query Engine		
Resolution:			
Description			
HTTP updates currently only allow a single TQL command.			
SPARQL update will address some of this, but a more flexible approach will be to support Talis changeset files. Note that these files only permit modification on a single subject at a time, though they can include both inserts and deletes in the same file.
