

Mulgara - Bug #179

Doing a FILTER REGEX with 2 parameters gives an error

02/03/2009 05:44 AM - Paula Gearon

Status:	Closed	Start date:	
Priority:	High	Due date:	
Assignee:	Paula Gearon	% Done:	0%

Target version:	SPARQL Query Engine		
Resolution:	fixed		
Description			
Simple queries with 2 parameter regex filters fail with NPE. e.g.:			
<pre>select * where { ?s ?p ?o filter regex(?o, ".*sold.*") }</pre>			

History

#1 - 02/03/2009 05:47 AM - Paula Gearon

The error message being printed was the message of the "Cause", but NPEs have neither a cause nor a message. So the name of the exception is being printed. See [r1474](#).

The NPE was being caused by the regex class expecting a "flags" parameter, though this is optional. Cleaned up code in several places to handle nulls in this argument. Fixed in [r1473](#).
