

Mulgara - Feature #18

Provide a language independent interface to Mulgara compatible with HTTP transport.

Target version:			
Resolution:			
Description			
<p>We need to support access to the entire Session API from languages other than java.</p> <p>
</p> <p>
</p> <p>Both xml-rpc and REST have been proposed as alternatives. OTOH we should probably support both.</p> <p>
</p> <p>
</p> <p>XMLRPC because of it's wide language support and classic-rpc model.</p> <p>
</p> <p>REST because it is a better fit to W3C architecture, and provides benefits when working with loosely coupled distribution.</p>			

History

#1 - 02/10/2009 12:02 AM - Paula Gearon

Everything but transactions have now been implemented as REST.
