Mulgara - Feature #18

Provide a language independent interface to Mulgara compatible with HTTP transport.

Description

```
We need to support access to the entire Session API from languages other than java.
<br/>

<br/>
Both xml-rpc and REST have been proposed as alternatives.  OTOH we should probably support both.
<br/>

<br/>
XMLRPC because of it's wide language support and classic-rpc model.
<br/>
REST because it is a better fit to W3C architecture, and provides benefits when working with loose
ly coupled distribution.
```

History

#1 - 02/10/2009 12:02 AM - Paula Gearon

Everything but transactions have now been implemented as REST.
