Description

CONSTRUCT may work with any multiple of 3 elements, however Mulgara only handles a single set of 3.

e.g. The following query:

```
construct { $s a ns:item; dc:text $o } where { $s ns:pred $o }
```

Gives an error of:

```
cannot construct graph with 6 columns.
```

This took a counter that moves across a row when "next" is called, and resets when the row is exhausted and the next one is needed. Fixed in r1475
