Description			
<p>I'm see the server dump a stack frame when I run a query using curl. I'm trying to query the system graph, on a freshly installed server with no loaded graphs. I don't know if I'm doing this right, but I don't think the server should barf. The curl file is:</p>			
<pre>--url = "http://localhost:8080/sparql/" --include --header "Accept: application/sparql-results+xml" --get --data-urlencode "query=select ?x ?y ?z where {?x ?y ?z}" --data-urlencode "default-graph-uri=http://localhost:8080/#"</pre>			
<p>mulgara.log says:</p>
