

Mulgara - Feature #24

Return a literal's datatype in ItqlInterpreterBean.execute()

10/01/2006 09:29 AM - ronald -

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Paula Gearon	% Done:	0%
Category:	Mulgara	Estimated time:	0.00 hour
Target version:			
Resolution:	fixed		
Description			
<p>The results returned by <code>[[ItqlInterpreterBean]].execute()</code> (and by extension the other <code>execute*()</code> methods)</p> <p>&lt;br/&gt;</p> <p>do not include the datatype (or language) of a literal. The attached patch adds those as attributes of the</p> <p>&lt;br/&gt;</p> <p>object node.</p>			

History

#1 - 10/01/2006 09:31 AM - ronald -

Adds a literal's datatype and language tags to the xml result doc.

#2 - 02/25/2007 07:38 PM - Paula Gearon

The patch erroneously included the language attribute when it was just an empty string. This has been fixed.

<br/>

<br/>

There were a lot of script results in the tests which had to be updated. This has been done, and it all appears to be correct. Waiting for user acceptance before closing the issue.
