

Mulgara - Feature #27

Eliminate all use of static variables from Mulgara

10/16/2006 07:13 AM - Andrae Muys -

Status:	New	Start date:	
Priority:	Low	Due date:

Target version:			
Resolution:			
Description			
<p>The use of static (ie. global) variables prevents Mulgara being restarted within a jvm. These are not necessary, and are being used to avoid considering where objects belong within the system.</p> <p>
</p> <p>
</p> <p>Note this does not apply to static *constants* - being compile-time immutable values they are not an issue.</p>
