Target version:				
Resolution:	fixed			

Description

```
The Fedora folks found and a fixed a memory leak in Kowari 1.0.5. It
looks like this patch is still needed. See also
[http://prototypo.blogspot.com/2005/09/kowari-memory-leak-found-and-fixed.html]
Here is the one-line patch against Mulgara svn head:

```
Good catch.

I hadn't looked at this fix before, but this is indeed missing.  Running tests now.
```
