

Mulgara - Bug #45

doclet error during javadoc build

02/25/2007 11:19 AM - ronald -

Status:	Closed	Start date:	
Priority:	Low	Due date:	
Assignee:	Paula Gearon	% Done:	0%
Category:	Mulgara	Estimated time:	0.00 hour
Target version:			
Resolution:	fixed		
Description			
<p>While building the javadocs, the following error occurs a couple times:</p> <pre>

 [javadoc] Building tree for all the packages and classes...
 [javadoc] java.lang.IllegalArgumentException: Illegal group reference
 [javadoc] at java.util.regex.Matcher.appendReplacement (Matcher.java:713)
 [javadoc] at org.mulgara.doclet.RCSTaglet.replaceRcsKeywords (RCSTaglet.java:198)
 [javadoc] at org.mulgara.doclet.RCSTaglet.toString (RCSTaglet.java:128)

 The problem is that any \$ needs to be escaped in the replacement string.

 A simple patch for this is attached.</pre>			

History

#1 - 04/15/2007 04:05 AM - ronald -

Patch applied in rev [#195](http://mulgara.org/trac/changeset/195).
