

Mulgara - Bug #56

Distributed blank nodes not uniquely identified

04/15/2007 05:55 AM - Paula Gearon

Status:	Feedback	Start date:	
Priority:	High	Due date:

Target version:			
Resolution:			
Description			
Any blank nodes returned from a distributed resolver may contain the same gnode IDs as local blank nodes. This means they cannot be distinguished. Add a factory in the appropriate place to mark blank nodes from elsewhere with the IP of their source.			

History

#1 - 05/15/2007 09:02 PM - Paula Gearon

Now working, but needs multiple server regression tests for this bug.

#2 - 07/16/2007 04:57 PM - Paula Gearon

Works between a local and a remote server. However, the nodes require server IDs embedded if blank nodes from multiple remote servers are to be distinguished.
