Category:	Mulgara	Estimated time:	0.00 hour
Target version:			
Resolution:	wontfix		

Description

Can get an OOM while running full set of scripted tests in OS X on a PPC architecture. The point of failure appears to vary.

While it appears that such failures are not critical, the reason for them should be tracked down, if possible.

History

#1 - 10/15/2008 05:08 AM - Paula Gearon

- Status changed from New to Closed

- Resolution set to wontfix

PPC Macs are no longer available here, and are being phased out. This reduces the concern, and makes it impossible to work on anyway.
