

Mulgara - Bug #7

Xalan missing in Java 1.5

07/10/2006 04:47 AM - Paula Gearon

Status:	Closed	Start date:	
Priority:	High	Due date:	
Assignee:	Paula Gearon	% Done:	0%
Category:	Mulgara	Estimated time:	0.00 hour
Target version:			
Resolution:	fixed		
Description			
<pre>src/jar/descriptor/src/java/org/mulgara/descriptor/DescriptorElement.java uses classes from org.apache.xalan.templates.
 This package was included in Java 1.4, but not in Java 1.5. The library needs to be brought in manually.

 The bug does not show up on a Mac, as apple have included the package in the jar file:
 /System/Library/Frameworks/JavaVM.framework/Versions/1.5.0/Classes/.compatibility/14compatibility.jar</pre>			

History

- Status changed from New to Closed

- Resolution set to fixed

Xalan was brought in some time ago, and is working fine in 1.6 now.
