Target version:			
Resolution:	fixed		

Description

```
src/jar/descriptor/src/java/org/mulgara/descriptor/DescriptorElement.java uses classes from org.ap
ache.xalan.templates.
<br/>
This package was included in Java 1.4, but not in Java 1.5.  The library needs to be brought in ma
nually.
<br/>

<br/>
The bug does not show up on a Mac, as apple have included the package in the jar file:
<br/>
/System/Library/Frameworks/JavaVM.framework/Versions/1.5.0/Classes/.compatibility/14compatibility.
jar
```

History

#1 - 02/21/2009 03:07 AM - Paula Gearon

- Status changed from New to Closed

- Resolution set to fixed

Xalan was brought in some time ago, and is working fine in 1.6 now.
