

Mulgara - Feature #92

Replace JRDF as an internal API for Mulgara with our own representation RDF

| Resolution: | fixed | | |

Description

We should continue to provide support for JRDF as an external client API, but we should move to our own set of interfaces for handling RDF values internally.

Downside: This will not be a backwards compatible change to things like the Resolver API; and this will also involve changing **alot** of interfaces inside Mulgara.

History

#1 - 10/15/2008 04:38 AM - Paula Gearon

- Status changed from New to Closed
- Resolution set to fixed

JRDF is now a part of Mulgara, and is being updated as a part of the current project. For now it keeps its name, but it will eventually be moved into the org.mulgara namespace. The external API will also be phased out.
